Note 1) Siphon pipes and siphon elbows are covered by our product warranty provision.
2) Flexible metal tubes are produced by another manufacturer and delivered via our company.
   These tubes are covered by that manufacturer’s product warranty provision.
   Our warranty provision does not cover them.
   Contact our sales representative for more information.

### Siphon Pipe

**Application**
Used for collecting drain from a roll. Installed at the tip of an internal pipe.
Suitable for rolls with an inner diameter of 500 mm or less.

**Order**
1. When newly ordering our products
   Please provide information on sag height H (or the roll inner diameter), size, and the direction of thread A. We determine overall length L.
2. When ordering our product you are currently using
   Please provide information on sag height H or overall length L, size, and the direction of thread A.

### Siphon Elbow

**Application**
Used for collecting drain from a roll. Install this at the tip of an internal pipe with a supplied lock nut, and then connect a pipe to thread A. Suitable for rolls with an inner diameter of 500 mm or more.

**Order**
Please provide size information.

Note: Determine the length of the pipe to be installed to thread A by considering the internal pipe deflection.
Accessory

Flexible Metal Tube

Application) Used for connection between a rotary joint and a stationary pipe.

Order) Please provide information on the fluid, temperature, pressure, size, length, fitting shapes on both sides, and material.

- Fitting Shapes and Materials
  1) Three types of fitting shapes are available: union (U), nipple (Ni), or flange (F).
  2) Two types of fitting materials are available: FCMB and SUS.
  3) The material of the tube and blade is stainless steel.

- Combination Example
  In addition to the UU or NiU type, the FU, FF, or NiF type is available.

- Precautions for Selection and Use
  1) Union (U) and nipple (Ni) have a taper pipe thread (JIS B 0203).
  2) Flanges (F) that conform to JIS, ANSI, or JPI standards, etc. are available.
  3) Select the tube length with reference to Table 1.
  4) When installing a flexible metal tube, slightly bend it in the rotation direction of roll.
     Furthermore, carry out pipe laying work so that excessive “tension”, “compression”, “torsion”,
     or “bending” is not caused. See the rotary joint instruction manual for more information.
  5) Bend the tube so that the bending radius is not less than the smallest bending radius shown in Table 2.
  6) As a flexible metal tube is a metal, it may suffer from metal fatigue. Replace it periodically.

If you have any questions, contact our sales representative.

Product Warranty

If a malfunction occurs during the warranty period, contact us or the distributor and send the product to us. Be sure to carefully pack the product for protection before sending it. After receiving the product, we will confirm the malfunction. If the malfunction was clearly caused by the materials of product components or the manufacturing method, we will repair the product in question or replace it with a new one free of charge.

Product Warranty Provision

1. Warranty Period
   < New products >
   One (1) year and six (6) months after shipment (from the manufacturing date) or one (1) year after installation, whichever comes first.
   < Repaired products >
   Six (6) months after shipment (from the manufacturing date).

2. We charge a fee for repairs in any of the following cases.
   ① Failure after the warranty period has expired
   ② Failure caused by use of the product deviating from the service conditions
   ③ Failure caused by misuse (improper storage, installation, pipe laying, operation or maintenance, etc.)
   ④ Failure caused by fluid contaminants or foreign objects in the fluid
   ⑤ Failure caused by relocation, transport, or falling of the product after delivery
   ⑥ Failure caused by disassembly, repair, or modification done by personnel other than our service personnel
   ⑦ Failure of the product attributed to using materials or according to standards specified by the customer
   ⑧ Failure of the product attributed to using materials provided by the customer
   ⑨ Failure caused due to unavoidable acts of nature such as fires or other natural disasters

3. Scope of Responsibility
   Our responsibility shall be limited to repairs, replacements, or transport expenses covered by this product warranty provision. Expenses or damages caused by said failures above shall not be covered.

4. Applicable Regions
   This product warranty provision shall be applicable to products installed in Japan.

5. Another Agreement
   If another product warranty agreement is made separately with us and clearly states that said agreement shall have priority over this product warranty provision, this provision shall not be applicable.

6. This product warranty provision shall not restrict the customer's legal rights.
